Correction to Methenamine Hippurate (Must be Implemented by 3/5/02)

The November 20, 2001 publication incorrectly listed the product Methenamine Hippurate 1 gm tablets as having a FUL when it should have listed Methenamine Mandelate 1 gm tablets. Methenamine Hippurate should be deleted from the FUL publication and Methenamine Mandelate should replace it with a FUL of \$0.2923.

Timolol Maleate – CLARIFICATION (Published 9/28/04)

Timolol Maleate 0.5% Ophthalmic Solution currently has a FUL of \$0.9000. It has recently come to our attention that Ista Pharmaceuticals has received FDA-approval for Istalol, which is their version of Timolol Maleate 0.5% Ophthalmic Solution. The FDA has determined that Istalol is not therapeutically equivalent to the other versions of Timolol Maleate 0.5% Ophthalmic Solution that are currently on the market. Therefore, the FUL of \$0.9000 does not apply to Istalol. However, the FUL does continue to apply to all other versions of Timolol Maleate 0.5% Ophthalmic Solution.

Retraction of Hydrochlorothiazide; Quinapril Hydrochloride (Published 05/06/2005)

In the memo of FUL changes that was released on 04/08/2005, three strengths (12.5mg; 10 mg, 12.5 mg; 20 mg, and 25 mg; 20 mg) of Hydrochlorothiazide; Quinapril Hydrochloride were added to the FUL. Since then it has come to our attention that this FUL was established erroneously through a systems error and this drug, in all three strengths does not, at this time meet the criteria for a FUL. Therefore, CMS is retracting this drug from this FUL update. This drug listing can be found under the “Deleted Drugs” category at this time, effective immediately.
